

Smart Label Award 2017 for HOBART

This prestigious prize for unique, innovative solutions in terms of functionality, technology, and ecological sustainability was awarded in the run-up to the international trade fair HOST in Milan. HOBART, the world's leading manufacturer of commercial dishwashers, is one of the award winners – for the second year in a row.

PREMAX AUP with PERMANENT-CLEAN AUTOMATIC SOIL REMOVAL

The hood-type dishwasher PREMAX AUP is considered to be the industry's most innovative product. It is the ground-breaking technology, including numerous patented global novelties, that makes it so unique. The PERMANENT-CLEAN automatic soil removal is, among other things, a standard feature of the PREMAX AUP. Thanks to this tool, pre-washing the wash ware by hand is now a thing of the past. The reason is the new filter system which directly pumps any food waste out of the machine. Therefore, the PERMANENT-CLEAN automatic soil removal not only saves staff and operational costs, but also protects the environment and provides permanently clean wash water inside the machine.
